

REMOTE LOAD

PUSH BUTTON SLURRY TANK FILLING

Control the agitation pump from the comfort of your tractor cab. The Remote Load hand held remote allows you to pull your tank under the load stand, push a button and fill. When the tank is full, simply push another button and head to the field.

HYDRAULIC VALVE KIT

Kit Includes: Hydraulic valve with universal mounting bracket; all hoses with couplings; receiver with external antenna; and 1 - hand held remote with charger.

Needle valve flow control device adjusts the speed of the cylinder eliminating excessive load stand vibration and movement.

Specialized double lock valves eliminate cylinder movement while unattended.

The weather proof receiver with a 500' range installs easily to 12v power supply.

Works with "open" or "closed" center hydraulics ensuring no oil heat build-up.

REMOTE CONTROL

Ideal for any animal confinement system where manure hauling from pit to field is required. The only "remote" system specifically designed and produced by a livestock producer for loading slurry tanks.

Optional "Engine Fuel Shut Off".

By pressing this button the valve will partially close allowing you to top off the tank.

With the touch of a button you're loading from the pit to your transport device.

Close the valve and your transport is ready to move to the field.

OPTIONAL THROTTLE CONTROL

The Optional Throttle Control lets you be in command of your pump speed from your hand held remote.

Throttle will automatically return to a preset "down" or "up" position once the buttons are pressed.

Optional "Engine Fuel Shut Off".

Stops throttle movement

Moves throttle from idle to half-open automatically.

Close valve at any throttle position with the touch of a button.

Once the throttle is in the idle position, this button will open valve.

Mounting screw area

Forward throttle stop locking collar

When removed, the self-adjusting hand bolt allows your lever to move freely.

Rear throttle stop locking collar

Mounting screw area

"Out of all the equipment we use, large or small, the most valuable piece is the Remote Load. With Remote Load we no longer have tired legs as a result of running from the tractor cab to the pit. No more having to deal with gusty winds and cold drizzly rain. Manure hauling is easy with the Remote Load device."

Rod Pratt, pork producer and custom hauler.
